Technical stacks

TECHNICAL SKILLS

- **Data processing & ETL:** ETL/ELT implementation using Python and SQL (joins, window functions, query optimization).
- **Analytics:** Diagnostic analytics using SQL/Python; Time Series Analysis, Funnel Analysis, User Path Analysis, Segmentation.
- **Data Visualization & Reporting:** Power BI (DAX, Power Query, data modeling, embedded analytics); Excel/Google Sheets for reporting and analysis.

TECHNICAL KNOWLEDGE

- **Data Analysis:** Proficient in descriptive, diagnostic analytics using statistics, storytelling, quantitative and qualitative methods.
- **Data Processing & Wrangling:** Strong proficiency in data cleansing, data transforming & data modeling for analysis.
- **Data Visualization:** Highly experienced in creating charts, graphs & dashboards using Power BI, analyzing data with DAX & metrics.
- **Database Management:** Proficient in working with relational database.

Work Experience

SALES STAFF

April 2025 – Jan 2026

SSM Printing Trading Company Limited

- Managed and expanded a B2B client base of 50+ corporate accounts, providing customized high-volume packaging and branding solutions.
- Coordinated with the production department to streamline order processing, ensuring 100% on-time delivery for complex printing projects.
- Increased client retention by 20% through cost-optimization consultancy and personalized service, consistently meeting quarterly sales targets.

Personal Projects

SALES ELECTRONICS PERFORMANCE DASHBOARD (POWER BI)

[Visit Link](#)

- Built an interactive dashboard to consolidate revenue, profit, and customer behavior data for the electronics sector.
- Applied DAX and Data Storytelling to visualize business trends and enable real-time performance monitoring.
- Enhanced sales strategies through faster decision-making, resulting in a 30% increase in reporting efficiency.

CREDIT RISK ANALYSIS

[Visit Link](#)

- Evaluated credit risk on a P2P lending platform using historical loan data (2007–2014) and the MECE framework.
- Connected borrower profiles and loan characteristics to identify key drivers of default through data storytelling.
- Supported clearer credit risk assessments and portfolio monitoring to minimize potential lending losses.

APP OPTIMIZATION ANALYSIS

[Visit Link](#)

- Analyzed the decline in e-wallet payment success rates by identifying bottlenecks in authentication and gateway redirects.
- Applied a User-Journey approach to pinpoint friction points across different app versions and network conditions.
- Proposed payment flow optimizations to improve user experience and reduce transaction abandonment.

ADIDAS SALES PERFORMANCE DASHBOARD (EXCEL)

[Visit Link](#)

- Designed an interactive dashboard to analyze nearly 10 thousand Adidas orders, visualizing revenue and profit margins.
- Used PivotTables, Slicers, and Dynamic Charts to enable multi-dimensional filtering by region and sales method.
- Identified top-performing products and monthly growth trends to support inventory and retailer optimization.
